Introducing the latest additions to our shower range

PRODUCT BENEFITSEXPLAINED

1 Outlet

One shower outlet.

2 Outlets, 1 On

Two shower outlets, which can only run separately.

Easy Fit Installation

Designed to make installation quicker and easier.

Luminance Chrome

A hard-wearing, flawless finish that lasts for years. It's also scratch resistant and salt spray tested to ensure added durability.

Family Safe

Thermostatic temperature control and automatic stops prevent surges of hot or cold water.

Drenching

This shower fully soaks you with water for the most indulgent showering experience.

Matching Taps and Showers

Matching taps and showers are available.

Rub Clean

There's no need to scrub. Limescale build-up can be easily wiped off the nozzle of this shower product.

Safe Touch

designed to keep the exterior cool to the touch, ensuring you're never at risk of scalding.

TMV 2 / NSF

High standard of thermostatic protection and suitability for use in the home.

AVAILABLE FINISHES

Chrome

Black

Brushed Brass

OUR SAFE TOUCH TECHNOLOGY KEEPS THE EXTERIOR OF THE SHOWER VALVE COOL TO THE TOUCH.

Safe Touch showers are cleverly designed so that the valve, or shower body, encases the hot water supply within the cold. This means that it stays cool to the touch, even when the water coming out of the shower is much warmer, to help reduce the risk of scalding.

WALLMOUNT TECHNOLOGIES.

WALLMOUNT 10

WALLMOUNT 10 is a fast-fixing kit that makes it faster to fit, maintain or replace a bar shower by enabling a rigid fixing of an exposed bar shower valves to 15mm pipework. It is compatible on all bar showers with 15mm inlet connections and has a brass base construction for a secure fixing to the wall.

WALLMOUNT 12

With two front-facing isolation valves, you can quickly and easily isolate the water supply at the point of installation, instead of having to switch it off at the mains. This makes it ideal for new bathrooms where you want to connect a water supply at first fix but install the shower later on so there's no risk of damage to the shower.

1. Innovative rubber seal within the WALLMOUNT 12, reduces the risk of water ingress back into the cavity.

2. The bar shower itself needn't be fitted until a later stage of the build process, protecting it from potential on site damage.

3. Isolate the water supply on the wall with just the turn of a screw, which negates the potential for any water damage during installation.

4. Quick & easy to remove and replace a bar shower onto the WALLMOUNT 12 for retrofit and maintenance and easy to upgrade to other bar showers within the bristan range.
