

BREW MASTER

BROCHURE 2024

Introducing Brew Master Hot Water Taps

A new brand of Kartell UK which offers you 3-1 and 4-1 hot water tap systems. Including both swan and square neck taps in a choice of 6 colours*.

* 4-1 taps are available in 6 colours. 3-1 taps are available in 3 colours.

Our products are simple to install and are designed with the customer in mind - offering multiple positive benefits by providing instant filtered boiling water and normal cold/hot/mixer water - with additional filtered cold drinking water if you purchase a 4-1 kitchen tap.

Reduced water waste

Instant 98°C hot water from your Brew Master tap at the exact amount you need for your cuppa, instant noodles or whatever your hot water is used for, it saves you water & energy. To improve energy efficiency the water can be digitally controlled between 45°C and 98°C.

Improved safety

Our safety spring button reduces the chance of children scalding themselves in the kitchen. Removing heavy kettles full of boiling water is also safer for elderly and less able bodied people.

Healthier lifestyle

With filtered hot water available between 45°C and 98°C and filtered cold or chilled water (with additional chiller) you can drink healthier water which will naturally benefit your health.

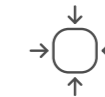

UK customer support and repairs

Our team of experts are here to help with any questions you may have, or if you need a repair just give us a call on 07450580323. 9am - 5pm (UK midweek).

More time

Why wait for the kettle to boil when you can get 98°C water instantly. Quickly prepare formula, mix granules, blanch vegetables or make a cuppa in seconds with instant pure filtered hot water.

More space

Who doesn't love a clean and tidy kitchen. Remove the need for a kettle in your kitchen and make additional free space on your worktops.

Up to 7 years warranty

Our products are of the highest quality materials, but we understand issues can arise from time to time. Therefore, we recommend you immediately register your product at the time of installation for your piece of mind! NOTE: Failure to register your product or provide a valid date of purchase invoice WILL invalidate your complimentary free 2 year guarantee.

Quick free delivery

Your product will be delivered to you within just 1 - 2 working days after purchase so get ready to throw that old kettle away!

We are into your safety

Our products are built with many safety features included to help keep you and your family safe in the kitchen. The spring latched boiling water tap handle makes it harder for children to use unaided, reducing the chance of scalding accidents.

Our products are also certified by many of the major certifications worldwide :

Brew Master is designed to provide a quality product for both home and business

Our 2.4L tank is perfect for a home, apartment or small office. While our 4L tank is designed to offer you more instant hot water for larger communal areas in hotels, businesses and healthcare.

What are the running costs?

Our environmental footprint has become ever more important. We are all acutely aware that we need to reduce water consumption and waste - pouring stale old water from your kettle down the drain can stop. With a Brew Master Boiling Water Tap - all this waste stops immediately - now that is something we must all take seriously!

Is it going to be cheaper than using a kettle you ask?

For most households or businesses the savings that come from using a boiling water tap will soon stack up. On average it costs 5p to boil a full kettle, add them up and you'll soon be saving a lot of water, energy, time and money. Now who doesn't want that?

Our boiling water taps are also designed to keep you healthy. Do you ever check the inside of your kettle? If you are in a hard water area you'll need to de-scale your kettle regularly. With a Brew Master our filter system stops limescale build-up, keeping your water cleaner and healthier.

i The filter needs changing every 6 months minimum - every 4 months in hard water areas. Customers can sign up to our filter partners no hassle [filter subscription service](#), where they will save money on each filter and automatically receive replacement filters every 4 or 6 months.

As an added bonus our boiling water tanks include a filter recognition system that lets you know when you need to replace your filter - keeping your water and tap clean from limescale.

Brew Master boiling water products are also manufactured from the highest grade international food standard materials.

Save both time and money while keeping you and your family healthy.

We are into your environment

Reduce your plastic waste by drinking filtered water, from your 4-1 kitchen tap, instead of buying endless supplies of plastic water bottles that could damage the environment.

Our products also help you to only use the water you require - removing the need to empty and refill your kettle which wastes valuable water.

Our styles

From the beauty and functionality of our unique curved-shaped pull-out tap to our 3-in-1 and 4-in-1 taps. Not only has beauty been crafted into our designs, but with a hot or cold pull-down spray function we provide all the convenience of the latest in boiling water tap developments and technologies.

Swan Spout Style

Square Spout Style

Pull-Down Spout Style

Our quality

Our range of taps are crafted from solid brass in a choice of finishes including polished chrome plate, brushed nickel, brushed gold, gunmetal, brushed copper and matt black.

The all brass body ensures an exceptional performance and life expectancy. With the highest standards of finish, our taps will give years of practical use whilst maintaining its great look.

Our under counter water filter system also retains minerals that are essential to your body. Enjoy healthier water.

Introducing Pure Filtration

Innovative Multi Filtration

Our multi-stage filtration ensures great user experience: With a filtration accuracy of 0.5µm the filtration system effectively reduces chlorine, taste and odour. It can effectively reduce heavy metals, chemical impurities, sediment and other large particles. The system also retains minerals that are essential to your body.

Scale reduction: The technology used for scale reduction is Ion exchange. The limescale removal efficiency is around 98% as it destroys the construction to avoid from Ca and Mg to form as CaCO₃ (Calcium Carbonate). The Ca and Mg are still left in the water as Ions and they are helpful with health.

Quality materials: The activated carbon block and other advanced components ensure efficient and safe filtration. Effectively keeping the filter clean and ensuring a more reliable use from the inside out.

Easy installation: The system should only ever be connected to a cold water supply. With innovative push-fit connection, the entire installation process takes just minutes and the twist-and-lock design ensures that you can replace the filter in seconds.

Fast flow rate & multiple uses: The fast water supply provides pure water that tastes fresh. Developed for household and commercial use, the filter system can be installed in your home or office to meet your daily water needs. Ideal for drinking, cooking and cleaning.
